Area(s):	CON.CR: Upland Road Area	
Designation(s):		
Building Materials(s):	Roof: Tar, Built-up Wall: Concrete Cinderblock; Concrete Unspecified Foundation: Concrete Unspecified	

The Massachusetts Historical Commission (MHC) has converted this paper record to digital format as part of ongoing projects to scan records of the Inventory of Historic Assets of the Commonwealth and National Register of Historic Places nominations for Massachusetts. Efforts are ongoing and not all inventory or National Register records related to this resource may be available in digital format at this time.

The MACRIS database and scanned files are highly dynamic; new information is added daily and both database records and related scanned files may be updated as new information is incorporated into MHC files. Users should note that there may be a considerable lag time between the receipt of new or updated records by MHC and the appearance of related information in MACRIS. Users should also note that not all source materials for the MACRIS database are made available as scanned images. Users may consult the records, files and maps available in MHC's public research area at its offices at the State Archives Building, 220 Morrissey Boulevard, Boston, open M-F, 9-5.

Users of this digital material acknowledge that they have read and understood the MACRIS Information and Disclaimer (<http://mhc-macris.net/macrisdisclaimer.htm>)

Data available via the MACRIS web interface, and associated scanned files are for information purposes only. THE ACT OF CHECKING THIS DATABASE AND ASSOCIATED SCANNED FILES DOES NOT SUBSTITUTE FOR COMPLIANCE WITH APPLICABLE LOCAL, STATE OR FEDERAL LAWS AND REGULATIONS. IF YOU ARE REPRESENTING A DEVELOPER AND/OR A PROPOSED PROJECT THAT WILL REQUIRE A PERMIT, LICENSE OR FUNDING FROM ANY STATE OR FEDERAL AGENCY YOU MUST SUBMIT A PROJECT NOTIFICATION FORM TO MHC FOR MHC'S REVIEW AND COMMENT. You can obtain a copy of a PNF through the MHC web site (www.sec.state.ma.us/mhc) under the subject heading "MHC Forms."

Recommended for listing in the National Register of Historic Places.
If checked, you must attach a completed National Register Criteria Statement form.

Use as much space as necessary to complete the following entries, allowing text to flow onto additional continuation sheets.

ARCHITECTURAL DESCRIPTION:

Describe architectural features. Evaluate the characteristics of this building in terms of other buildings within the community.

48 Upland Road (CON.1842) is an international style residence which is set back in the woods and partially obscured from view by mature evergreens and deciduous trees. The building is located on the north side of Upland Road approximately five-hundred feet west of the intersection of Old Marlboro Road. The property is located on the south shore of the Assabet River. The two-story residence adopts an irregular plan and is constructed of concrete, concrete block with glass infill. The residence is capped by a flat roof constructed of built up roofing material. Access to the residence is provided by an entry at the east end of the south elevation. A car port (CON.1843) is located south of the residence on the north side of Upland Road. The car port is constructed of concrete block end walls with metal posts which support the flat roof. The roof framing of the roof is exposed. Mid-century modern properties have just recently begun to be studied; 48 Upland Road appears to be a well-preserved example of the type constructed in Concord during the mid-twentieth century with a carport that is contemporary to the construction of the house.

HISTORICAL NARRATIVE

Discuss the history of the building. Explain its associations with local (or state) history. Include uses of the building, and the role(s) the owners/occupants played within the community.

Upland Road developed on the edge of the 19th century village of West Concord in the first half of the 20th century. The street was developed by Kennan Damon and his partners in the Riverview Trust and was the first area south of the Assabet River to be subdivided in West Concord. The developers extended Pine Street to the south and largely paid for the construction of the Pine Street Bridge in 1927. The bridge was replaced in 1941.

The property was purchased in 1946 by Robert J. Bergemann Jr. (1922-2010).¹ Robert was employed as a staff engineer at the MIT Lincoln Laboratory. During the height of the Cold War, Robert headed up the Space Surveillance Group at the Lincoln Laboratory which was investigating the use of electro optics for space surveillance.² A building permit application dated January 25, 1962 in the Town of Concord Building Department files indicates that Robert was the architect and contractor for the construction of the house. The Building department files also contains hand drawn sketches of the exterior and interior spaces by Robert J. Bergemann Jr.

On 19 January 2011, a project consisting of demolishing the existing single-family dwelling and carport and reconstructing a new single-family dwelling, deck and an attached garage, and other improvements to the property including the removal of "the existing 1000-gallon oil tank and bomb shelter" was brought before The Natural Resources Commission DEP File #137-1102 due to the fact that the property is located in the 200-foot Riverfront Area of the Assabet River. At the Commission meeting on 23 March 2011, the demolition of the existing single-family dwelling and carport was approved. As of April 2013, the property is still standing. The property is still owned by the Bergemann family in 2013.³
